

Locca Access Control Systems

Versatile remote access control system, operates in conjunction with your current door locking system, **for use with electric strikes, maglocks and electric locks - refer to the Complete Hafele for Architectural Ironmongery**

System can be programmed and controlled by the end user. One remote can be programmed into an infinite number of receivers (allowing one remote to be used on multiple doors/gates/barriers etc.). Additional and alternative (Lifestyle) remotes available to order separately

4.6 billion rolling code technology

Simple, quick installation: requires no training, no software programming

The system can either be hard wired or simply plugs into the mains

Pre-programmed and pre-wired for easy installation

Rechargeable battery in case of power cut (incorporated in design)

12 month warranty included

Note: PVC or composite doors require an electronic multi point lock - further information available on request

1. Press the Locca remote
2. Remote transmits a signal to the Locca receiver
3. Receiver activates a locking device
4. Door unlocks
