Assembly guide

Before you start...

Check the pack and make sure all the components are included – if not call the Helpline on 01788 548800 and our team will get things sorted. Please read these instructions carefully before beginning the installation. Heat shields can be fitted before or after your doors are fitted, but they must be fitted before your oven is installed. This kit is only suitable for use in a built under oven housing unit. A separate kit is sold for use in tall oven housings.

Component parts

- 1x Left Hand Heat Shield
- 1 x Right Hand Heat Shield
- 12 x 12 mm Fixing Screws

Tools required (Not Supplied)

- Bradawl
- Cross Head Screwdriver

1. Position the Left Hand Heat Shield as shown in figure 1 and align with the top edge of the cabinet. Mark the screw positions with a bradawl as shown and secure using the 12 mm screws provided.

   **PLEASE NOTE:**
   The rebated end of the heat shield should be placed at the top of the cabinet.

2. Repeat for the Right Hand Shield.

3. Cut outs are provided in the shield to allow your oven to be fixed to the cabinet once the shields are in place. If the fixing positions for your oven do not align with any of the standard cut outs, drill through the shield using a suitable metal drill bit.

**Care and maintenance:**

- Wipe clean regularly with a soft damp cloth.
- More stubborn marks can be removed with a soft damp cloth using mild detergents.
- DO NOT use corrosive or abrasive cleaners, which may damage the protective coating of the shields.
